The flowers made from Sola plant are created to represent the four seasons. As for the tree branch, we use White Lady stick that is peeled with the white layer remain. So we dye and decorate it with the Sola plant's flowers. We carefully select each branch with similar shape so that the flowers can be placed evenly along the branches when we put the bundle inside the glass bottle.

The Luxury

Roses can be traced back to 70 million years ago. In Greek and Roman mythologies, roses are the symbols of love and beauty. They are also identified with the birth myth of the goddess Venus or Aphrodite. It is said that the goddess's tears fell down to the ground and fused with the blood of her lover 'Adonis' who were killed by wolves. The blood and tears on the ground then turned into a dark red flower – a rose. The beautiful design of the package is inspired by the Greek and Roman classical architecture and the rose myth. The glass bottle is shaped like a Roman column with a delicate rose made from Sesbania in pastel shades to convey the fantasy and romantic feelings.
